With our Predictive Modeling Software we can simulate industrial, road, rail and air noise effects on noise sensitive properties.

Using State of the Art Sound Level Measuring Equipment and Computer Software, we provide a Full Service from the Problem Through To The Solution.

Extended Licence Application...Complaints from Neighbouring properties...Problems with the Outside Smoking Area...Noisy Extract Units...Any other issues, we will be able to help you.

With results in $1/3$ octave band, $1/1$ octave band or narrow band, exact results are extrapolated and any correspondence with local authorities could be undertaken, be it PPG24 or BS4142:1997 planning appeals or dealing with noise complaints.

We have membership with the Institute of Acoustics (IOA), Chartered Engineering (CEng), European Engineers (Eur Ing), and BS EN ISO9001 accreditation.

In the event of a noise complaint, extension to the premises or to the hours of operation, all negotiations with the Environmental Health Officer can be undertaken on your behalf.

 dB Consultation Ltd is a part of the dB Group of  Acoustic Companies
