Website: www.dbc-ltd.co.uk

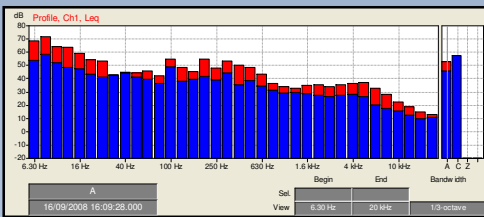

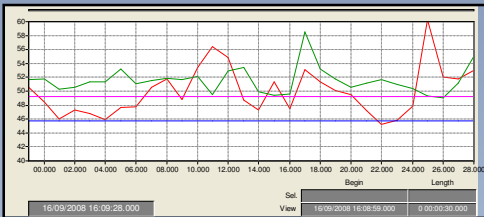

With our Predictive Modeling Software we can simulate industrial, road, rail and air noise effects on noise sensitive properties.

Are you familiar with the changes in "The Control of Noise at Work Regulations" of 2005? We offer a full range of noise monitoring, education, training for all employees and practical and financially prudent advice for managers.

Using State of the Art Sound Level Measuring Equipment and Computer Software, we provide a Full Service from the Problem Through To The Solution.

With results in 1/3 octave bands or 1/1 octave bands, exact results are extrapolated and any correspondence with local authorities is undertaken.

We have membership with the Institute of Acoustics (IOA), Chartered Engineering (CEng), European Engineers (Eur Ing), and BS EN ISO9001 accreditation.

Complaints from your staff? Office areas or factory floors too noisy? We provide full noise at work surveys to the latest government regulations and can specify solutions to ease most situations.

dB Consultation Ltd is a part of the dB Group of Acoustic Companies
