Website: www.dbc-ltd.co.uk

With our Predictive Modeling Software we can simulate industrial, road, rail and air noise effects on noise sensitive properties.

With results in 1/3 octave bands or 1/1 octave bands, exact results are extrapolated and any correspondence with local authorities is undertaken.

Using State of the Art Sound Level Measuring Equipment and Computer Software, we provide a Full Service from the Problem Through To The Solution.

We have membership with the Institute of Acoustics (IOA), Chartered Engineering (CEng), European Engineers (EurEng), and BS EN ISO9001 accreditation.

Extended Licence Application...Complaints from Neighbouring properties...Problems with the Outside Smoking Area...Noisy Extract Units...Any other issues, we will be able to help you.

In the event of a noise complaint, extension to the premises or to the hours of operation, all negotiations with the Environmental Health Officer can be undertaken on your behalf.

dB Consultation Ltd is a part of the dB Group of Acoustic Companies
